

# Lawson Safari/Firefox Patch

## **Description**

The lawson portal in LSF9 work pretty good with internet explorer 6+ but when used with others browsers like Safari or Firefox It freeze. Because it uses a specif IE behaviours who is not standards in W3C specification([www.w3c.org](http://www.w3c.org)).

The LawsonBrowserPatch fix it, and change specific pieces of code who is not standard and html code to work in standard static mode.

## **Scope**

Ajust lawson portal system to work with browsers Safari or Firefox. Modifying the portal html and javascript code.

## **Calling**

```
java -jar LawsonBrowserPatch.jar -w <webdir> -t <tmpdir>
```

## **Limitations**

Java 1.5 or Above

Space to save copy of html and js modified

Safari 1.0+

Firefox 1.2+

index.html
error.html
inkbasket.html
pfdetail.html
about.html
admin/rolemgr/index.htm
dialogs/error_msgdlg.htm
dialogs/foldersel.htm
dialogs/fontpick.htm
dialogs/msgdlg.htm
dialogs/promptdlg.htm

dialogs/searchdlg.htm
drill/drsearch.htm
forms/formhost.htm
forms/prevhost.htm
forms/wizard.htm
hotkeys.htm
objects/tabhost.htm
pages/index.htm
reports/jobdef.htm
reports/joblist.htm
reports/jobschedule.htm
reports/printfiles.htm
users/preferences/index.htm
utility/bldanalysis.htm
utility/bldindex.htm
utility/formdel.htm
utility/formpdl.htm

The modification is not a replacement of the source code but modification, then if any customization is preserved because the original code still there.

### ***Relation of scripts modified***

PotalConfig.js
common.js
servenv.js
home.js
inkbasket.js
pages.js
portal.js

### ***Cleaning cache***

After applying the patch is necessary clear all caches.
